In re Application of: Michael Miravet SORRIBES Confirmation No.: 6451
Patent No.: 7,093,600 B2 Application No.: 10/050,618
Patent Date: August 22, 2006 Filing Date: January 16, 2002
For: DEVICE FOR NON-INVASIVELY Attorney Docket No.: 81421-4006
CORRECTING THE SHAPE OF A
HUMAN EXTERNAL EAR.

REQUEST FOR CERTIFICATE OF CORRECTION UNDER 37 C.F.R. § 1.322

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Certificate

SEP 01 2006

Sir:

of Correction

Patentees hereby respectfully request the issuance of a Certificate of Correction in connection with the above-identified patent. The correction is listed on the attached Form PTO-1050. The correction requested is as follows:

On the title page, Item (30) **Foreign Application Priority Data**, change "Jul. 27, 1909" to -- Jul. 27, 1999 --. Support for this change appears on the Declaration and on the certified copy of the priority application.

The requested correction is for an error that appear to have been made by the Office. Therefore, no fee is believed to be due for this request. Should any fees be required, however, please charge such fees to Winston & Strawn LLP Deposit Account No. 50-1814. Please issue a Certificate of Correction in due course.

Respectfully submitted,

8-29-06

(57) **ABSTRACT**

A device for non-invasively correcting a human external ear is disclosed. The device comprises a flat fixture with an adhesive for sticking the fixture together with two fold parts on an ear which is folded about a folding line along a zone which is to be corrected with a permanent deformation. The fixture can be fixed on the ear easily and conveniently. In attached state, it is hardly visible, and the patient does not feel the fixture as something unpleasant and irritating to wear. The fixture can advantageously be used for correcting a small child's jug-ear which particularly easily can be given a permanent shape within the first few weeks after birth where the concentration of oestradiol is highest.
